INTERN EXPERIENCE

Corning’s Summer Internship Program is rich with hands-on experience. You’ll love, work, and experience the communities in which Corning operates, while learning on-the-job skills.

Throughout the program you will be expected to deliver results against our business and financial objectives, applying knowledge and practices both independently and as a team, while completing challenging projects.

Working with a supervisor/mentor, you will gain real work experience, interacting with key technologies, subject matter experts, and company leaders.
